-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 7, 2005 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-5, 9-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 recites, "...a radially-directed series of notches afforded on a flat upper part of a head of the aspiration conduit, the notches becoming channels only when the head draws up to a bottom of an expansion chamber..." First, the specification discloses "notches 11" on the lower edge of trunco-cylindrical wall 10. No notches are disclosed on the flat upper part of the head of the aspiration conduit. See Specification, page 3, lines 25-27 and page 4, lines 11-15. Second, the disclosure, as filed does not disclose the notches becoming channels only when the head draws up to a bottom of an expansion chamber. If this were the case, the current version of the claim would contradict the previous version of the claim. Additionally, the channels are on the flat upper part of the head whether the head is placed against the bottom of the expansion chamber or not.

Similarly, claim 9 recites "...the open-top channels becoming flow channels only when the head draws up a bottom of the expansion chamber..."

Claim 10 recites "...that provides a depression by action of an exiting jet from the exit nozzle..." The specification discloses that the depression is caused by action of an exiting jet from fixed nozzle 4 and not the exit nozzle 6.

5. Claims 1-5 and 10-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim 1 recites "a flat upper part" in line 10. It appears to be a double inclusion of the "flat upper part" recited in line 7.

Claim 10 recites "...a body (1) connected to an aspiration conduit (15) in turn connectable to a container for holding a detergent..." The phrase "in turn connectable" appears to be grammatically incorrect.

Response to Arguments

6. Applicant's arguments with respect to claims 1-5 and 9-16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher S. Kim whose telephone number is (571) 272-4905. The examiner can normally be reached on Monday - Thursday, 6:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on (571) 272-4919. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
